

Empowering Maritime Email and Collaboration A Robust Solution for Users in Greece and Lebanon

Blue Fleet Group has been a market player since 1996, active in various branches of the shipping industry and constantly expanding its services to its clients. They operate from their offices in Greece and Lebanon and their services include Chartering, Operations and S&P.

Roy Khoury took over his father's business, who had established one of the first shipping companies in Lebanon, back in 1961. This ongoing family business has also welcomed Cherif Khoury in 2012, who has completed his bachelor in Maritime Business and Maritime Law at Plymouth UK, as well as his Master's in Shipping, Trade and Finance at CASS Business School London. After twenty-five years of experience in the industry, Blue Fleet Group acquired the control of over 30 vessels on an exclusive basis, carrying more than 3,000,000 tons of cargo yearly on international routes. Today, the Group occupies a significant position in the market, reflected by noticeable long-term relationships with first class charterers, ensuring constant employment to its fleet. Blue Fleet Group is the exclusive broker of the United Group Offshore Lebanon.

Bluefleet Group successfully adopted TELiX in 2006 and is currently leveraging all its features including the Shipbroking suite modules, the iTELiX mobile application and recently OMNi, the web version of TELiX email collaboration suite.

Cherif Khoury, head of the chartering department, emphasizes the group's belief in building a solid foundation on stable ground. He states, "LgMAR is continuously evolving, always keen to go the extra mile on maritime needs. TELiX closely aligns with the shipping industry's advancements, providing the solid foundation for email and collaboration. Over the course of our fruitful partnership, LgMAR has definitely earned our trust and our highest recommendations."

LgMAR is a software company founded in 1989 by a team of dedicated experts in computer science and maritime business. LgMAR with the TELiX system introduced email to the maritime industry and nowadays is part of a greater TELiX Suite which includes Fleet Tracking and Performance Monitoring, Vessels' Position List, Orders List, Cargo/Port/Company Information and Vessels Sale &Purchase. LgMAR is recognized as a leading company in email software with several hundreds of installations and thousands of satisfied users in Greece, Europe, North and South America, Far East and Middle East.
