

Windows Telix Suite

LgFleet: Track your Vessels and Monitor their Performance!

Ship-management operations greatly depend on accurate vessel tracking and performance monitoring. **LgFleet**® is tracking vessel movements, monitors fleet performance, takes care of noon reports, relieves you from data entry, and assists operators to turn data into useful and valuable reports and graphs.

Whether you need to examine the latest or historic information on voyages, movements, consumption, weather, engine, GPS position, agents, and course tracking, **LgFleet**® will assist

you to visualize your data on the map or produce on the spot standard or specialized reports and graphical comparisons.

Correlating steaming speed with consumption, bunkering and deviations from contract requirements is just a few keystrokes away, instantly available.

LgFleet® is working in tandem with the Windows Telix suite and LgMAR Ports Database with more than 10.000 names of ports, synonyms and other details, in order to offer a comprehensive ship-management tool.

Windows Telix suite of products is the leading maritime Message Management System that introduced electronic messaging in shipping. Windows Telix suite includes functionality for: Fleet Tracking and Performance Monitoring, Vessels' Position List, Orders List, Cargo/Port/Company Information, Voyage Estimation, Investment Appraisal, Laytime Calculation, Vessels Sale and Purchase, Message AutoRead, Remote Access, Archiving, etc.
