

Windows Telix WT3 Offline mode to review your messages on the go

A great usability enhancement requested by Telix users who needed a local copy of their messages to take away.

Offline mode allows WT3 users to store on their PC a selected group of messages (i.e. last week/month/etc) and review these later while on the go without an Internet connection.

You may search, open, view, print your offline messages anywhere/anytime by opening WT3 in offline mode.

Some quick tips:

- Select a group of messages using the search messages functions    and use the "Export" button to save these to your PC for later use.
- Login to WT3 and check the offline mode to use the previously exported messages.

Offline operation
Username

- Use the quick search to find any word in messages, subject, addressee etc

We welcome your ideas and requests for new Telix functionality and usability at support@lgmar.gr

WT3 is part of the Telix suite of products, the leading maritime message management system that introduced electronic messaging in shipping.
