

## Windows Telix Shipbroking suite **AutoRead© Self Learning from your messages!**

The Self-Learning feature of **AutoRead©** for Positions, Orders and AutoSearch will save you from frequent manual updates and the need to purchase expensive data. Messages are automatically analyzed and recognized with immediate results available to all TELiX users.

The self-learning feature achieves **high success rates** thanks to heuristics and new advanced algorithms developed by LgMAR. Vessel particulars are identified, messages are automatically tagged and classified available for search by Telix message management and shipbroking suites. Detailed explanatory notes may assist users to build on and further expand Self Learning.

New vessels are recognized and saved for future use with **AutoRead© Self Learn**. Our shipping specific Glossary (15,000+ words compiled by LgMAR), as well as our Cargo and Ports databases, are continuously updated with many new synonyms and ports - even new Chinese ports recently opened!

**AutoRead© Self Learn** updates are available at no cost to all our customers with a support contract for these applications. We frequently update data and functionality along with the regular upgrades of your TELiX server.

*Windows Telix suite of products is the leading maritime Message Management System that introduced electronic messaging in shipping.
