Windows Telix WT3
Auto Exclude Duplicate Emails

One more great usability enhancement requested by Telix users. Telix will sense and filter accordingly all duplicate incoming messages to save you valuable time.

Most users take advantage of the powerful Telix feature that allows to view more than one department and mailboxes seemingly, in one go. Nevertheless whenever senders sent the same email to more than one mailboxes you may end up with duplicate messages.

Telix will exclude such duplicate messages (i.e. sent to personal/operations/technical or sent to personal/chartering/info) and filter any unnecessary duplicates.

Auto exclude for duplicates may be turned on/off per user or company and allow to fine tune every case and need in your company.

We welcome your ideas and requests for new Telix functionality and usability at support@lgmar.gr
