OMNi TELiX
Attention texts per message for all users

Telix is offering a secure working environment, fully integrates with your security infrastructure like antispam/antivirus, automatically recognizes senders in your address book, internal/external senders, the unified mailbox makes it easier to collaborate on messages and tag useful or unneeded emails.

This new Omni feature allows to present attention texts to every user in your company according to sender and/or message tags i.e., like the following caution for attachments send by unknown senders:

Colored attention texts assist users to focus on specific messages. Some attention labels may warn users for external or unknown senders, spam, attachments etc. Other attention labels may notify for important senders, positions, orders, vessels etc.

Attention texts are companywide and will not interfere with user settings like high/low preference lists, very important messages VIP, automatic user rules, saved search selections etc.

Omni is the web interface for Telix, the leading maritime message management system that introduced electronic messaging to the shipping industry in 1989. Omni enables maritime users to collaborate efficiently with a sleek, fast and easy to use interface for email, fax, telex, sms, drag and drop company and personal filing, extensive classification, remote access, and a plethora of company and personal tools to handle your messaging and communications.

LgMAR is a software company founded by a team of dedicated experts in computer science and maritime business, to develop highly specialized software in the area of telecommunications.
